

PRINCE MEHTA

Data Engineer

☎ 8866862484 | ✉ prince.mehta.de@gmail.com | 🔗 [LinkedIn](#) | 🐙 [GitHub](#) | 📍 Rajkot, GJ

SUMMARY

Data Engineer with 2+ years of experience designing and building scalable ELT pipelines and Lakehouse architectures. Proficient in Snowflake and BigQuery, with hands-on experience implementing Medallion Architecture using PySpark, dbt (Cloud), and Apache Airflow for pipeline orchestration. Proven ability to optimize warehouse costs and automate end-to-end data workflows through advanced SQL and Python.

EXPERIENCE

Data Engineer, Solomo360

Jan 2024 - Present

Data Engineer

Rajkot, Gujarat

- Developed and maintained analytics views and stored procedures powering 30 dashboards for **~600 daily users** across 200+ business locations.
- Reduced average query time by **~70%** through pre-aggregated mart tables, partitioning, and clustering.
- Re-architected workloads from Snowflake to BigQuery, reducing costs from **~\$40K/year to ~\$13K/year**.
- Built **28+ Cloud Functions** in Python to ingest and sync data across Mixpanel, Monday.com, BLVD, Snowflake, and BigQuery - automating data movement to Google Sheets, GCP, and PostgreSQL staging.
- Integrated BLVD API to automate daily appointment audits, saving **1.5 hours of manual work daily**.
- Streamlined media performance reporting and billing via Cloud Functions, saving **~30 hours monthly**.
- Implemented ETL pipelines using **Weld and Stitch** to ingest data from **6+ platforms** including Facebook Ads, Google Ads, and GMB into BigQuery.
- Deployed **Apache Superset on Kubernetes** with Node.js-based embedded dashboard access.
- Automated backup and deployment workflows via **K8s CronJobs** and **GitHub Actions**, eliminating manual intervention.
- Built SQL-driven reporting pipeline integrating BigQuery with an **LLM layer** to auto-generate PDF reports and enable natural language Q&A on location-level data.

Web Developer (Node.js), Prolix Technikos

Mar 2023 - Dec 2023

Web Developer

Rajkot, Gujarat

- Developed backend services and REST APIs using Node.js, integrating with data stores and external systems.

PROJECTS

Data Lakehouse Architecture (Databricks, dbt, PySpark, Airflow) | [GitHub](#)

Mar 2026 - Present

- Architected a Medallion Architecture pipeline using PySpark and dbt Cloud to consolidate 5+ data sources into a unified dataset.
- Orchestrated Bronze ingestion and dbt Gold layer runs end-to-end using Apache Airflow on Docker.
- Implemented CDC patterns via Delta Lake MERGE-based upserts with deduplication and timestamp conflict resolution across 6 Silver layer tables.
- Added SCD Type 2 history tracking via dbt snapshots for 5 dimension tables and watermark-based incremental loading for the Fact table.

SKILLS

Data Engineering: Snowflake, BigQuery, PySpark, Databricks, dbt (Cloud), Apache Airflow, Apache Kafka, Medallion Architecture, Data Modeling (Dimensional)

Languages & Tools: Python, Advanced SQL, Node.js, Git, PostgreSQL

Cloud & DevOps: GCP (Cloud Functions, Storage), Azure (AKS, App Services), GitHub Actions

Analytics & BI: Looker Studio, Apache Superset

EDUCATION

Nirma University, Ahmedabad

2018 – 2022

Bachelor of Technology in Computer Science (**CGPA: 8.55**)

Ahmedabad, India
